Future Plan

SA Thread & Accessories Ltd. is currently working on its expansion project. They are going to add a dyeing section in their existing factory premises, to fulfil their demand for dyeing yarn. After thorough research, it was found that going for third party support for dyeing is very costly, time consuming and has quality constraints. As a result, having our own dyeing setup will help us to reduce significant amount of costs and also control quality more effectively.

03

We always believe in green environment. We have a garden at our backyard and also at our rooftop. There are trees of various fruits and vegetables planted and are also taken care of with utmost priority. This eventually helps us to create an healthy environment for the company and also the surroundings.
